

Hunter Innovations, Ltd.

Finishing Instructions

If you choose to order your lamp post, bird feeder/house post or window garden accent unfinished, you may want to paint it. Although painting our product is not required for longevity, the appearance will be enhanced. These suggestions may help.

Materials for Finishing

- 1 quart exterior latex paint
- 1 tube latex caulk (caulk all joints)
- Small container of painters putty (to fill fastener holes)
- Paint brush
- Caulk gun
- One (1) sanding sponge with “fine” grit

Procedure for Finishing

The most successful finish will be achieved if you follow this procedure:

1. Putty fastener holes – allow to dry thoroughly
2. Lightly sand puttied areas
3. Caulk all joints – allow to dry thoroughly
4. Apply 1-2 coats of paint
